New Text Messaging Service

Dundonald Medical Centre is installing some new computer software that will allow us to send text messages to patients' mobile phones. Text messages are fast and more ecologically friendly than writing to patients and are often more convenient than a telephone call.

If you would like to sign up for this service please complete the consent form below:

Primary Care Messaging Consent Form – Declaration

I consent to the practice contacting me by text message and/or email for the purpose of health promotion and appointment invites.

I acknowledge that appointment invites by text are an additional service and that this method of notification may not always be the chosen method of contact.

I understand the responsibility for cancelling appointments still rests with me.

I can withdraw from the text messaging service at any time.

I am responsible for advising the practice of any changes in my details including my mobile number and email address.

Patient's Name	
Date of Birth	
Mobile Number	
Email Address	
Signed	
Date	

Text messages are generated using a secure facility however they are transmitted over a public network and as such may not be secure. The practice will not transmit any information which would enable identification of an individual patient.

Office Use: EMIS No: _____ Date added: _____ Initials: _____
